1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Chau et al 2007/0005685. Chau discloses at least one user input device (attached devices 107 [0035]), attached to a consumer transaction server (client computer 104 [0036]), and a vendor transaction server (web server 101 [0035]). See figure 1. It is disclosed that phone lines may be used for connection of the servers and the input devices [0035]. It is disclosed that the input devices and the servers may be implemented through PCs [0037]. It is disclosed that gift cards may be used to effect payment [0005].

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Doran et al 2006/0037835 discloses an ATM network in which gift cards may be redeemed.
